[The King Of Crustaceans – Key Generator](#)

Ver2

Absolute Parasite+ Instructions

Absolute Parasite+ is Very Effective against parasite outbreaks in fresh water, this includes internal/external (ecto/endo) Parasitic worms, Skin and Gill Flukes & Protozoa. These Parasites cannot generally, be seen by the naked eye. A skin scrape and microscope will be needed to determine an infestation.

External (endo) parasites such as fish lice can be seen by eye these tend to appear as a green/grey looking disc-shaped parasite that attaches its self to the bodies of fish. in the case of Anchor Worms, these will appear as a small translucent stick, or rod protruding from the body, or around the gill areas.

Ponds (Absolute Parasite+ is safe to use with in ponds containing salt)

Use Absolute Parasite+ to help prevent seasonal parasite outbreaks we recommend treating at the start of the spring and the end of the autumn periods. Only add this medication when the pond is not being exposed to high UV light levels from (Sunlight). Continue to feed the fish as normal providing water conditions are within acceptable levels. You will need to test your pond water to determine this. Absolute Parasite+ is a two-dose treatment that needs to be repeated after 14 days whenever using any type of medication always ensure plenty of oxygen saturated water ds being provided especially when treating river species.

Keep Biological filtration running to maintain good water quality.

Note:

It is a normal behaviour for your fish to flash/rub or jump after any parasite medication has been added.

Ultraviolet/Ozone

Switch off Uv's and Ozone generators also remove any chemical absorbent media from filters Uv units and ozone makers can be switched back on 14 days after you have finished treating for parasites.

For extreme parasite infestation

We recommend dosing the pond with Absolute-cT (Chloramine-T) 14 hours prior to medicating with Absolute Parasite+.

Absolute-cT helps by stripping the fish of any thick/heavy mucus build up on the body that will be preventing maximum exposure of medication to the parasites.

Caution: Should be taken when using Absolute-cT with high oxygen dependent species. First of all check your ponds pH and KH prior to added any brand of Chloramine-T as it can be very toxic in soft water. If your pH is below pH7 (acidic) and has a general hardness below 6°dH (soft water) reduce the amount of Chloramine-T by 75%. Absolute-cT can have an effect on biological bacteria if this reason carry out regular monitoring of the water conditions such as (NO2) Nitrite and (NH3/NH4) Ammonia and add Absolute Bio-Gel to maintain Biological quality.

Dosage Rate: Add on day 1 and 14 (Repeat on day 28 if a second course is required). Add 1g per 50 litres (11 gallons) or 20g for 1000 litres (220 gallons) Absolute Parasite+ will work at low temperatures but may take longer to be come fully effective.

Water Volume Calculator:

Measure in feet- Length x Width x Average Depth x 6.25 = Total amount of gallons
Multiplied by 4.54 to convert to litres

Harmful if swallowed.

Warning:

- Wash splashes from skin and eyes immediately.
- Do not eat, drink or smoke when using this product.
- IF SWALLOWED: Call a POISON CENTRE or DOCTOR/PHYSICIAN if you feel unwell.
- Rinse mouth.
- Dispose of contents/container or hazardous or special waste collection point.

MAY BE HAEMFUL TO INVERTEBRATES INCLUDING: SHRIMPS, CRABS OR OTHER CRUSTACEANS; SNAILS OR OTHER MOLLUSCS; STARFISH OR OTHER ECHINODERMS; CORALS. DO NOT USE IN AQUARIA CONTAINING THESE SPECIES.

Use within 3mths of Opening

Storage:

- * Keep sealed, store in a dry dark place
- * Keep away from direct sunlight
- * Store below 38°

**FOR ANIMAL TREATMENT ONLY.
MANUFACTURED IN ACCORDANCE
WITH THE SMALL ANIMAL
EXEMPTION SCHEME 0020**
